

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	4 September 2026
Team ID	Servicenow
Project Name	Automated Network Request Management
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

PROBLEM

How might we automate the network request management process to reduce manual work, speed up approvals, improve request assignment, and provide transparent request tracking?

- Manual network request processing can cause delays.
- Approval of network requests may require manual intervention.
- Assigning requests to the appropriate IT/network team can take time.
- Users may have limited visibility of their request status.
- Manual data entry can result in errors.
- Users may not receive timely notifications.
- Tracking pending, approved, rejected, and completed requests can be difficult.

Selected Problem: “Manual network request processing leads to delays in submission, approval, assignment, tracking, and resolution. Therefore, an automated ServiceNow-based solution is required to manage the complete network request lifecycle.”

Step-2: Brainstorm, Idea Listing and Grouping

Request Management

- Network Request Catalog Item
- Request form and validation
- Centralized request records

Automation

- Automatic request/database number generation
- Automatic status updates
- Automatic assignment

Approval

- Automated approval workflow
- Approve/reject functionality
- Approval history

Notification

- Request submission notification
- Approval/rejection notification
- Assignment notification
- Completion notification

Tracking

- Request status tracking
- Request history

SLA Management

- SLA monitoring
- Resolution-time tracking
- SLA breach notifications

AI/Smart Automation

- AI-based priority prediction
- Duplicate request detection
- Assignment recommendation
- Suggested resolution

Reporting

- Administrator dashboard
- Request reports
- Request performance monitoring

Step-3: Idea Prioritization

Ideas are prioritized based on their Importance/Impact and Feasibility, following the same prioritization approach as the reference template.

Idea	Importance / Impact	Feasibility
Automated Network Request Submission	High	High
Automated Approval Workflow	High	High
Automatic Assignment	High	High
Automated Notifications	High	High
Request Status Tracking	High	High
Automatic Request/Database Number	High	High
SLA Monitoring	High	Medium
Dashboard and Reporting	Medium	High
Duplicate Request Detection	Medium	Medium
AI-Based Priority Prediction	Medium	Medium

Final Selected Solution

Automated Network Request Management using ServiceNow.

The solution should automate: Request Submission → Approval → Assignment → Notification
→ Tracking → Resolution → Closure
